

“They say you should find something fun to do and then find a job within it. I think have.

I love coding”

Experience

H5 Föryelsebyrå AB - Internship

2022-09-26 - 2022-12-02

Built a landing page from scratch for their booking site/service Adventure Hero to attract more users. I did this together with two other LIAs. We built the page with Next.js and Mantine (css library).

Website: <https://business.adventurehero.se>

In addition, I learned how to create tests in Cypress and helped them with the development of their other product Plugga.Tech. Also this built in Next.js and Mantine.

Wallmander & Co - Internship

2023-02-06 - 2023-05-16

- Storyblok - Investigated the possibility to automatically translate texts into different languages when applying new texts in the default language. I created a test server environment and made a mockup case.
- BigCommerce - Created a Boilerplate with Next.js for future E-commerce use. I integrated BigCommerce and created dynamic component blocks suited to be customized from WordPress.

Education

Webbutveckling inom E-handel
Medieinstitutet Göteborg

2021-09 - 2023-05

Grades: VG in all courses

Merits: Diploma for best Master thesis

Extra

Played soccer until I turned 23

I believe in “Sharing is caring”
