

"They say you should find something fun to do and then find a job within it. I think have.

I love coding"

## Personal Qualities

Team player

Driven

Problem solving

Leadership

## Hard Skills

Grade in relation to my skills

React

MongoDB

Next.js

MySQL

Node.js

Cypress

TypeScript

Mantine.dev

PHP

Tailwind UI

Stripe.js

Material UI

## Experience

H5 Föryelsebyrå AB - Internship

2022-09-26 - 2022-12-02

Built a landing page from scratch for their booking site/service Adventure Hero to attract more users. I did this together with two other LIAs. We built the page with Next.js and Mantine (css library).

Website: <https://business.adventurehero.se>

In addition, I learned how to create tests in Cypress and helped them with the development of their other product Plugga.Tech. Also this built in Next.js and Mantine.

Wallmander & Co - Internship

2023-02-06 - 2023-05-16

- Storyblok - Investigated the possibility to automatically translate texts into different languages when applying new texts in the default language. I created a test server environment and made a mockup case.
- BigCommerce - Created a Boilerplate with Next.js for future E-commerce use. I integrated BigCommerce and created dynamic component blocks suited to be customized from WordPress.

## Education

Webbutveckling inom E-handel  
Medieinstitutet Göteborg

2021-09 - 2023-05

Grades: VG in all courses

Merits: Diploma for best Master thesis

## Extra

Played soccer until I turned 23

I believe in "Sharing is caring"
